

#### > Features

- Size 0.34\*0.25 inch
- RoHS compliant, lead-free and halogen-free
- Fast response to fault current
- Low profile
- High voltage
- Compatible with high temperature solders

#### > Applications

- Computer, Mobile phones, Multimedia
- ia bhor Automotive, Industrial controls, Telephony and broadband
- Game machines, Portable electronics, Battery

#### > Electrical Characteristics (25°C)

#### > Vocabulary

- **I**<sub>hold</sub> = Hold current: maximum current device will pass without tripping in 25°C still air.
- **I**<sub>trip</sub> = Trip current: minimum current at which the device will trip in 25°C still air.
- $V_{max}$  = Maximum voltage device can withstand without damage at rated current ( $I_{max}$ ).
- $\mathbf{I}_{max}$  = Maximum fault current device can withstand without damage at rated voltage ( $V_{max}$ ).
- **P**<sub>d typ.</sub> = Typical power dissipated from device when in the tripped state at 25°C still air.
- **R**<sub>min</sub> = Minimum resistance of device in initial (un-soldered) state.
- **R**<sub>1max</sub> = Maximum resistance of device at 25°C measured one hour after tripping or reflow soldering of 260°C for 20 sec.

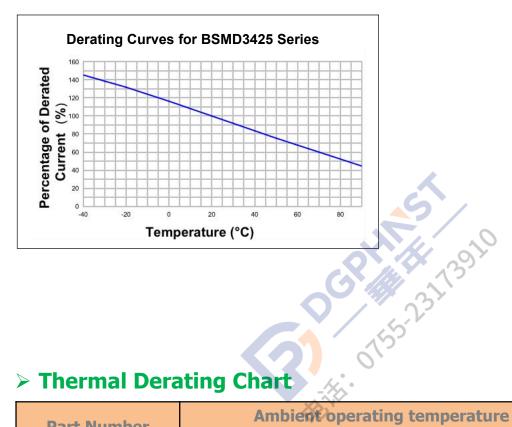

Caution: Operation beyond the specified ratings may result in damage and possible arcing and flame.

#### > Warning

- Users shall independently assess the suitability of these devices for each of their applications.
- Operation of these devices beyond the stated maximum ratings could result in damage to the devices and lead to electrical arcing and/or fire.
- These devices are intended to protect against the effects of temporary over-current or over-temperature conditions and are not intended to perform as protective devices where such conditions are expected to be repetitive or prolonged in duration.
- Exposure to silicon-based oils, solvents, electrolytes, acids, and similar materials can adversely affect the prolonged of these PPTC devices.
- These devices undergo thermal expansion under fault conditions, and thus shall be provided with adequate space and be protected against mechanical stresses.
- Circuits with inductance may generate a voltage (L di/dt) above the rated voltage of the PPTC device.

## > Thermal Derating Curve

### > Thermal Derating Chart

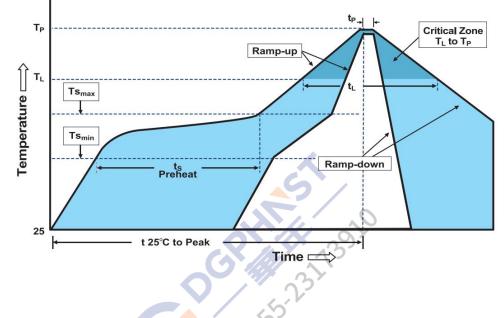

Part Number	Ambient operating temperature hold current(Ihold)								
Part Number	-40°C	-20°C	0°C	25°C	<b>40°C</b>	<b>50°C</b>	60°C	<b>70°C</b>	85°C

#### > Environmental Specifications

Test	Conditions	Resistance change				
Passive aging	+85°C, 1000 hours	±5% typical				
Humidity aging	+85°C, 85% R.H. , 168 hours	±5% typical				
Thermal shock	+85°C to -40°C, 20 times	±33% typical				
Resistance to solvent	MIL-STD-202, Method 215	No change				
Vibration MIL-STD-202,Method 201 No change						
Ambient operating conditions : - 40 °C to +85 °C						
Maximum surface temperature of the device in the tripped state is 125 °C						

#### > Soldering Parameters

Profile Feature	Pb-Free Assembly
Average Ramp-Up Rate(Tsmax to Tp)	3°C/second max
Preheat	
-Temperature Min(Ts <sub>min</sub> )	150°C
-Temperature Max(Ts <sub>max</sub> )	200°C
-Time(Ts <sub>min</sub> to Ts <sub>max</sub> )	60~180 seconds
Time maintained above:	
-Temperature(T <sub>L</sub> )	217°C
-Time(t∟)	60~150 seconds
Peak Temperature(T <sub>p</sub> )	260°C
Ramp-Down Rate	6°C/second max
Time 25°C to Peak Temperature	8 minutes max
Storage Condition	0°C~30°C,30%-60%RH

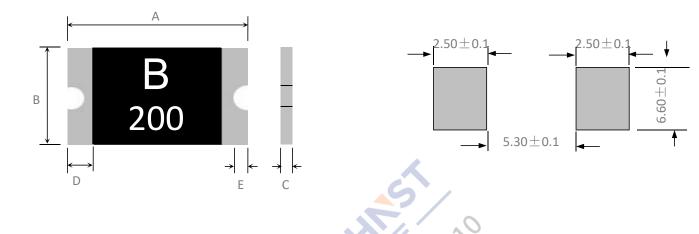

- Recommended reflow methods: IR, vapor phase oven, hot air oven, N<sub>2</sub> environment for lead-free.
- Recommended maximum paste thickness is 0.25mm.
- Devices can be cleaned using standard industry methods and solvents.

#### **Note 1:** All temperature refer to topside of the package, measured on the package body surface.

**Note 2:** If reflow temperatures exceed the recommended profile, devices may not meet the performance requirements.
